SUPERIOR TECHNOLOGY FOR DRIVING SAFETY

With a variety of premium features, F-MAX Select increases driver safety and comfort while utilizing cutting-edge technology to guarantee a dependable and enjoyable driving experience.

Alcohol Interlock Facilitation

Establishing a foundation for safety, alcohol interlock facilitation in the F-MAX Select offers the infrastructure for an alcohol ignition interlock device.

Auto High-Beam Headlamps

Making night drives safer, F-MAX Select features auto high-beam headlamps, automatically switching between high and low beams.

Blind Spot Information System

Elevating safety in the F-MAX Select, the blind spot information system detects other vehicles, pedestrians and cyclists in the blind spot on the passenger side during driving, using advanced radar sensors. This premium feature ensures a heightened level of safety by visually alerting the driver.

Collision Assist with Pedestrian Detection

F-MAX Select detects pedestrians and applies brake automatically when needed for added safety for both the driver and pedestrians.

Driver Alert System

With its commitment to safety and driver well-being, F-MAX Select monitors the steering and lane changing. When a sign of drowsiness or distraction is detected, it notifies the driver both visually and audibly.

Emergency Stop Signal

Reflecting the commitment to safety, F-MAX Select automatically activates hazard lights during emergency braking, enhancing visibility for other drivers to recognize emergency situations sooner.

Intelligent Adaptive Cruise Control with Stop & Go

Adapting to the speed of the vehicle ahead, F-MAX Select smoothly stops when necessary with its intelligent adaptive cruise control with stop&go function, effectively averting potential rear-end collisions and contributing to a safer driving experience.

Lane Keeping Aid

Monitoring lane markings in real-time, F-MAX Select alerts the driver and provides temporary steering input to prevent unintended lane departure, ensuring precise alignment for enhanced safety.

Moving-Off Information System

Enhancing safety, F-MAX Select identifies pedestrians and cyclists in the front blind spot before driving off, using advanced radar for clear visual and audible alerts.

Rear View Camera

Ensuring effortless and safe reverse maneuvers, the F-MAX Select assists drivers in detecting potential obstacles and taking corrective measures upon shifting the vehicle into reverse gear.

Tire Pressure Monitoring System

F-MAX Select continuously monitors tire pressure, ensures optimal and safest performance with visual and audible alerts with its tire pressure monitoring system.

Traffic Sign Recognition

F-MAX Select ensures your safety with traffic sign recognition, allowing you to drive without exceeding speed limits.
